TUGAS 6

Membuat Halaman Tambah Siswa

1.. pada app->view->siswa buat file dengan nama index.php

2. tambahkan source code seperti berikut

```php
<<?php echo view('partials/header') ?> <<?php echo view('partials/sidebar') ?>
<div class="page-wrapper">
    <div class="content container-fluid">
        <div class="page-header">
            <div class="row">
                <div class="col-sm-12">
                    <div class="page-sub-header">
                        <h3 class="page-title">Management Siswa</h3>
                        <ul class="breadcrumb">
                            <li class="breadcrumb-item"><a href="<?php echo
base_url('/'); ?>">Home</a></li>
                            <li class="breadcrumb-item active">Management
Siswa</li>
                        </ul>
                    </div>
                </div>
            </div>
        </div>

        <div class="student-group-form">
            <div class="row">
                <div class="col-lg-3 col-md-6">
                    <div class="form-group">
                        <input type="text" class="form-control"
placeholder="Search by NIS ...">
                    </div>
                </div>
                <div class="col-lg-3 col-md-6">
                    <div class="form-group">
                        <input type="text" class="form-control"
placeholder="Search by Nama ...">
                    </div>
```
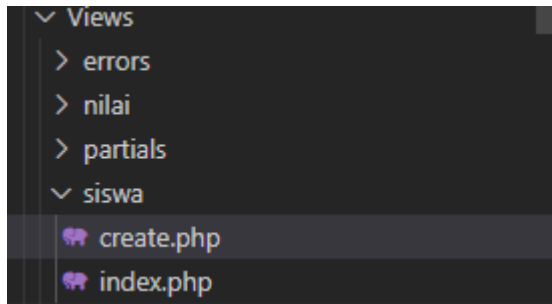

```html
                </div>
                <div class="col-lg-4 col-md-6">
                    <div class="form-group">
                        <input type="text" class="form-control"
placeholder="Search by Kelas ...">
                    </div>
                </div>
                <div class="col-lg-2">
                    <div class="search-student-btn">
                        <button type="btn" class="btn btn-
primary">Search</button>
                    </div>
                </div>
            </div>
        </div>
        <div class="row">
            <div class="col-sm-12">
                <div class="card card-table comman-shadow">
                    <div class="card-body">

                        <div class="page-header">
                            <div class="row align-items-center">
                                <div class="col">
                                    <h3 class="page-title">Students</h3>
                                </div>
                                <div class="col-auto text-end float-end ms-
auto download-grp">

                                    <a href="<?php echo
base_url('siswa/create'); ?>" class="btn btn-outline-primary me-2"><i
class="fas fa-plus"></i> Tambah</a>

                                </div>
                            </div>
                        </div>

                        <div class="table-responsive">
                            <table class="table border-0 star-student table-
hover table-center mb-0 datatable table-striped">
                                <thead class="student-thread">
                                    <tr>
                                        <th>No</th>
                                        <th>NIS</th>
                                        <th>Nama</th>
                                        <th>Tempat, tanggal Lahir</th>
                                        <th>Jenis Kelamin</th>
                                        <th>Agama</th>
                                        <th>Alamat</th>
```

```php

?></td>
                                                <td>
                                                    <div class="btn-group">
                                                        <a href="<?php echo
base_url('category/edit/' . $row['nis']); ?>" class="btn btn-sm btn-success">
                                                            <i class="fa fa-
edit"></i>
                                                        </a>
                                                        <a href="<?php echo
base_url('category/delete/' . $row['nis']); ?>" class="btn btn-sm btn-danger"
onclick="return confirm('Apakah Anda yakin ingin Data Siswa ini?');">
                                                            <i class="fa fa-trash-
alt"></i>
                                                        </a>
                                                    </div>
                                                </td>
                                            </tr>
                                        <?php } ?>
                                    </tbody>
                                </table>
                            </div>
                        </div>
                </div>
```

```
                </div>
            </div>
        </div>
        </div>
```

3. pada app->view->siswa buat file dengan nama create.php

4. tambahkan source code seperti berikut

```php
<<?php echo view('partials/header') ?> <<?php echo view('partials/sidebar') ?>
<div class="page-wrapper">
    <div class="content container-fluid">
        <div class="page-header">
            <div class="row">
                <div class="col-sm-12">
                    <div class="page-sub-header">
                        <h3 class="page-title">Management Siswa</h3>
                        <ul class="breadcrumb">
                            <li class="breadcrumb-item"><a href="<?php echo
base_url('/'); ?>">Home</a></li>
                            <li class="breadcrumb-item active">Management
Siswa</li>
                        </ul>
                    </div>
                </div>
            </div>
        </div>

        <div class="student-group-form">
            <div class="row">
                <div class="col-lg-3 col-md-6">
